

Hello!

we are

nibblesoftworks

Who We Are

Nibble Softworks contribute in technology industries to facilitate people reaching their goals with creative ideas and innovation. We focus on delivering our services using **agile approach**, an approach with flexible request, time, and cost, tailored to the clients' needs.

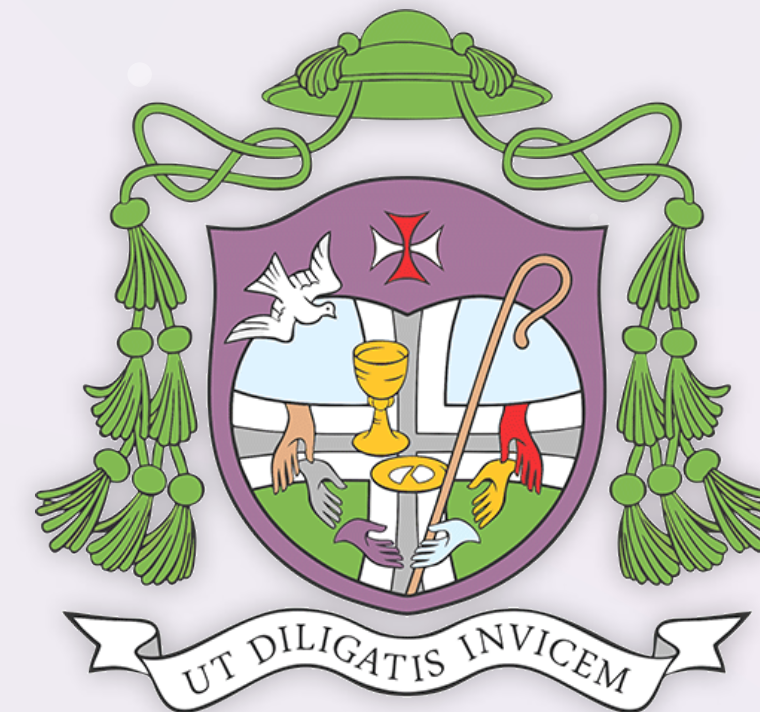

How We Do It

We divide a project into several sprint - a set period of time to complete specific work, with dedicated planning, development, and review process.

Flexibility to meet clients' needs, is our key point.

Our Clients

DIRGANTARA
YUDHA
ARTHA

Our Project

EROPA ELECTRONIC

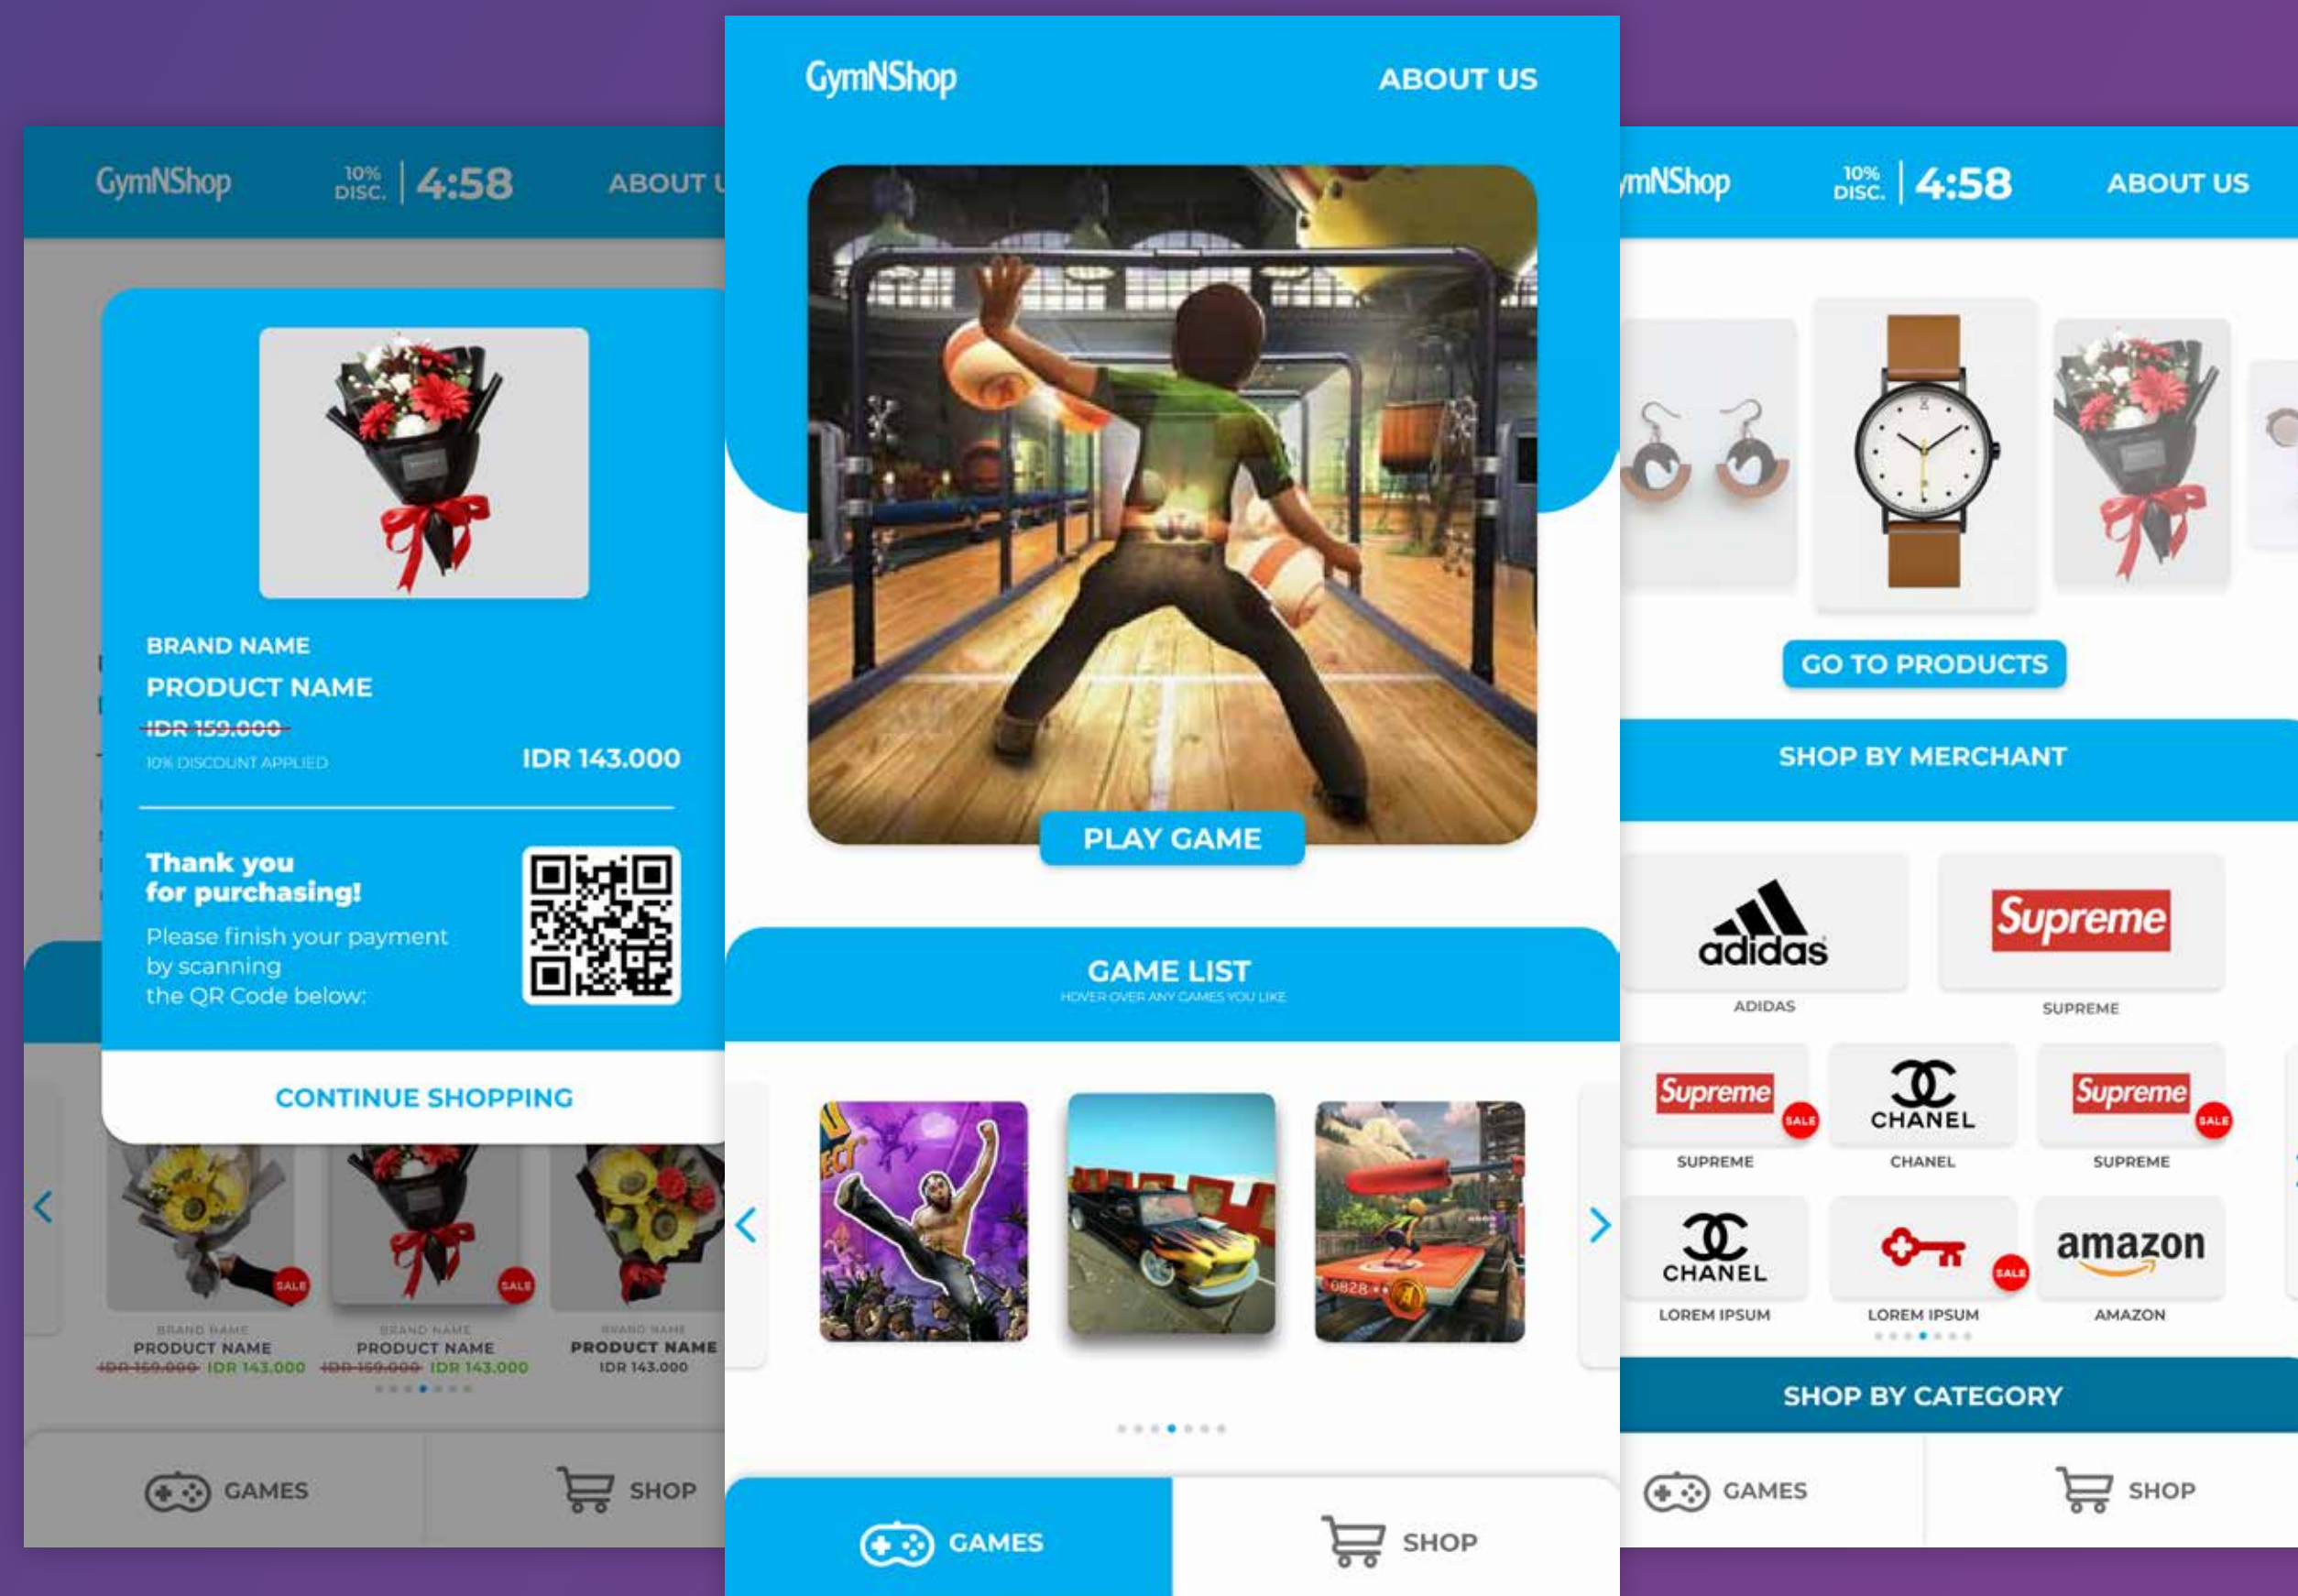

Toko Eropa is the biggest electronic distribution and electronic retail store in Ciamis. We created a full ERP system for their internal needs (Sales, Purchase, Inventory, etc) including their mobile application.

Before, they use manual system using paper and spreadsheets between their divisions for every business process. Using our ERP solution, they improve their speed significantly in handling their customers while minimizing unnecessary expenses; multiplying their profit.

Our Project

GYMNSHOP

GymNShop is a technology-based business unit of Kadoqu Group which focuses on digital marketing. We create a gaming/marketing device using Microsoft Kinect that can be used for mall/store visitors to play games and get discount as they play their games.

Our Project

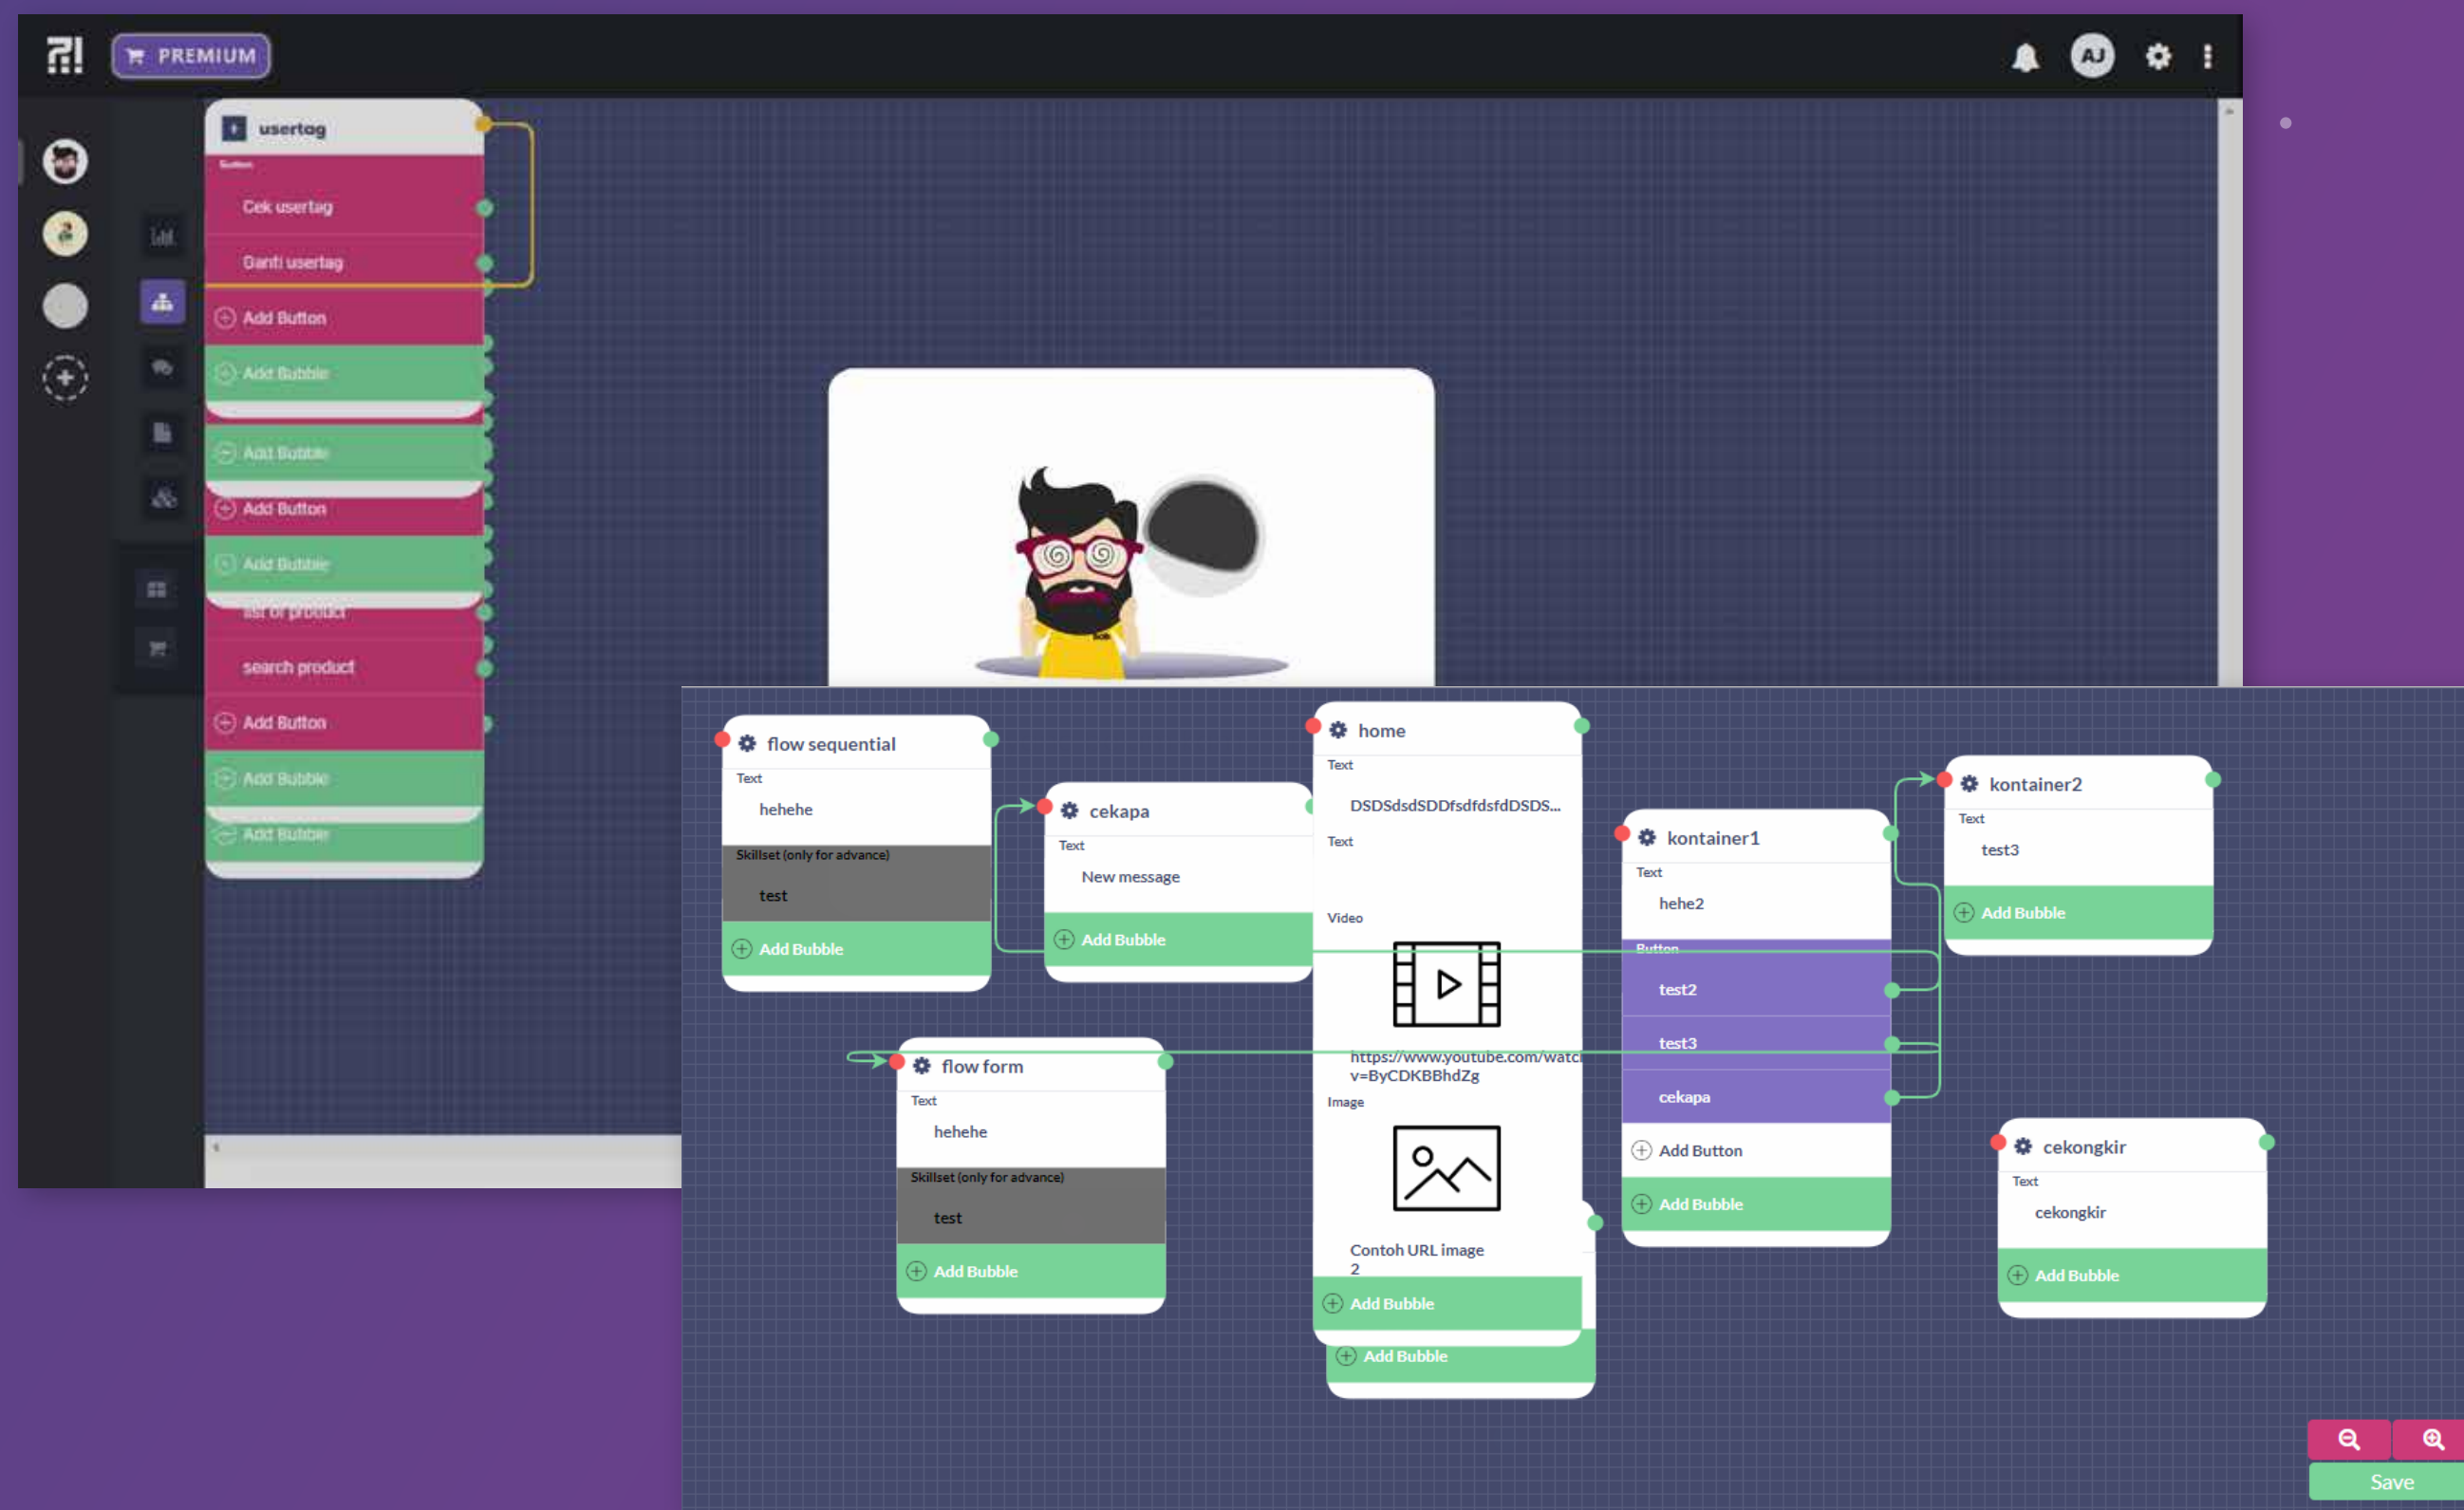

UNPAR STUDENT PORTAL

UNPAR is one of the biggest universities in Bandung. The student portal is used to provide services and gateway for every Unpar students, for example (Scheduling, online course assignment, payment, course grades, announcement, etc).

Our Project

TALKABOT CUSTOM FLOW

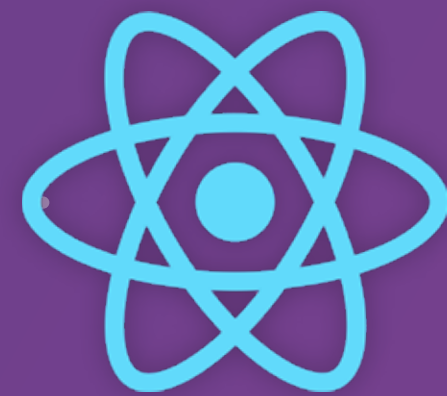

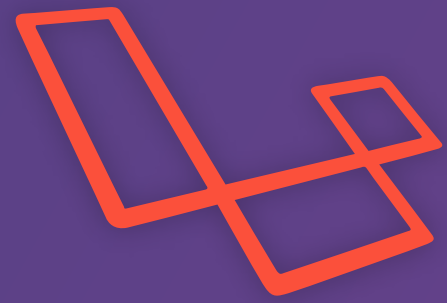

Talkabot is a chatbot service startup that is designed to be integrated with an organizational or business system focused in replacing customer services. Each of the chatbots are personilized based on their client's business so that it must be setup manually by code. We created a program, custom flow, that renders each of the bot's logic using graph and the user can manualy create and rearrange them so that their customers can try and build their own bot by themself.

Our Team

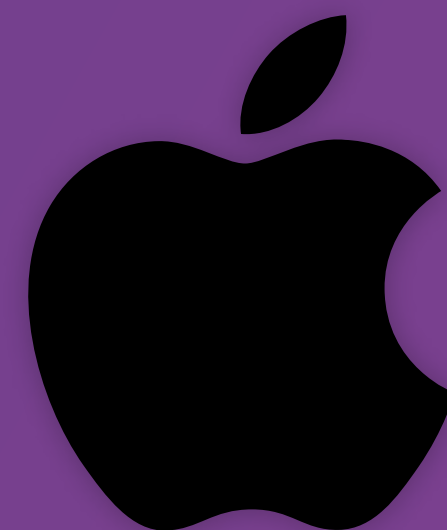

We are your team. Each member of us has our own talent and strength. Together, we have a breadth of expertise, creativity, and innovation. Our goal is to become a supportive team with cutting edge technologies with our signatures: warmth and friendliness.

Our Tech Stack

Flutter

php
