# Welcome

The evolution of technology has made changes for human life. There are many cases around us, which is the complicated process has become simpler with technology.

Booking taxi and motorcycle taxi more easier by online application, even buying clothes or food no longer need to go to the mall.

Javan, as an IT company, believes that technology will take human life better. Not only to facilitate activities, but technology should be touching lives and bringing more people into the conversation.

Starting with three employees who based in the internet cafe, Javan has grown much better. Currently we strive to be "Million Dollar Company", the company with millions dollars income in a year.

I'm as a Javan CEO, invites all parties who have the same vision and mission with us, to collaborate to create solutions with technology.

Javan is ready for developing website and mobile based application, doing research, developing innovation, and provide the best solution for customers.

*Wisnu Manupraba - CEO*
