

MAXQ GROUP

Company Profile

What We Do

Max Q Group is South East Asia's leading Blockchain infrastructure services company. We offer fully managed datacenter solutions for Proof-of-Work and Proof-of-Stake algorithms. Our expertise in mining infrastructure and hardware position us as the ideal partner for organizations to securely invest in the cryptocurrency space.

Our Mission

We believe that blockchain technology will disrupt industries across multiple sectors and open new doors for economic opportunity. Therefore, it is our mission to further advance the blockchain framework in a secure and scalable environment.

What is Blockchain

Blockchain is a decentralized ledger that is fully transparent and immutable. It enables individuals and/or organizations to transact and move assets without the need for a trusted third party or intermediary to validate transactions; instead a consensus mechanism is used to agree on the validity of the transactions. As the system is based on thousands of nodes in a peer-to-peer network, the data is replicated and updated on each and every node.

Your first step in the Blockchain industry

We live in a dynamic environment. As technology progresses, we want to meet the demand and be on the forefront of innovation. Blockchain is still in its infancy and by working with us, you will gain valuable insights and experience in the industry.
