- ✚ At least Bachelor Degree (S1) in Computer Science or equivalent
- ✚ Having a good interpersonal skill and a good attitude
- ✚ Ability to work as a team
- ✚ Ability to work under pressure
- ✚ Creative and fast learner

TECHNICAL REQUIREMENT

- Strong in logic and algorithm
- Having at least 1 year experience as Developer
- Having a good understanding with C#, .NET Framework & Visual Studio 2008
- Having a good understanding with SQL Server is an advantage
- Having experience as team leader is an ~~advantag~~ advantage

JAVA DEVELOPER

Job Description

Will be expected to analyze, design, plan, develop code and unit test functions/modules of an application. Work collaboratively with other members of the project team and the project manager to ensure deadlines and high quality delivery of the application in line with customer's business requirements.

He or she will be familiar and confident in performing the following roles as a member of a group of software engineers in a project:

- Analyze and design the function/modules of an application system that is being assigned
- Planning the development of the code needed to perform the function/modules
- Develop and unit test application code that will provide such function/modules according to the specifications using recommended process, standards and tools
- As appropriate, develop and maintain proper defined documentation necessary to maintain and support the application
- Strict adherence and application of configuration management procedures for changes to application system
- Provide necessary support to other team members as required to help deliver systems on schedule and with high quality

Requirement:

The candidate should have some or all the following skills:

- Bachelors or Masters in Software engineering or IT
- Experience in Java, J2EE technologies such as Tomcat, JBoss, EJB, Struts, POJOs
- Expertise in Object Oriented technologies using Java, J2EE, JSP/Servlet, JDBC API, EJB.
- Sound knowledge of frameworks like Struts or Hibernate.
- Experience in IDEs such as Eclipse
- Experience in software configuration management such as Clear case, CVS, SVN
- Good working knowledge of SQL/PLSQL
- Experience with Web Services
- Good working knowledge of Linux or Unix
- Ability to work independently
- Approx. 2- 4 years experience
- Self-motivated and good project management, interpersonal & communication skills

Ability to communicate in English is preferred.

MOBILE DEVELOPER:

JOB DESC:

- Develop and maintain high quality code for complex applications
- Collaborating with back-end engineers on integrating back-end logic with mobile applications
- Ability to work on, prioritize and manage multiple assignments and projects
- Anticipate problems and future technical needs and take necessary corrective steps to ensure they are addressed
- Ability to learn and adapt to new technologies quickly
- Ability to collaborate with high-performing, cross-functional team members on site and remotely

JOB REQUIREMENTS:

- Have a wide range of mobile development experience and an understanding of mobile software design concepts
- Passionate about programming, and always on the lookout for new technologies
- Android Development: Java, Xml, Eclipse ADT or AndroidStudio IDE, Gradle
- Strong object-oriented programming and design skills
- 2+ years of hands-on Android experience in a professional environment
- Having published at least one app published in the Play Store would be a great plus
- Comfortable with common demands of Android app development: compatibility libraries, responsive design using fragments, APIs of Google Play Services library like Maps and Analytics, dependency injection libraries like Guice, experience with A/R libraries like Metaio or Wikitude, consume of REST services using Google Client or Apache HttpClient libraries.
- Must have strong problem solving skills: must be creative, analytical, adaptable, logical and thorough and be willing to work in a team environment

SQL DEVELOPER:

GENERAL REQUIREMENT:

- ✦ At least Bachelors Degree (S1) in Computer Science or equivalent
- ✦ Having a good interpersonal skill and a good attitude
- ✦ Ability to work as a team
- ✦ Ability to work under pressure
- ✦ Creative and fast learner

TECHNICAL REQUIREMENT

- Strong in logic and algorithm
- Having at least 1 year experience with SQL Server Database
- Having a good understanding in Database Design such as Entity relationship Diagram (ERD)
- Having a good understanding with TSQL Query, Function, Procedure, Trigger
- Having a good understanding in Maintenance and administering SQL Server is an advantage
- Having experience as team leader is an advantage

SOFTWARE TESTER

GENERAL REQUIREMENT:

- Develop and maintain high quality code for complex applications
- Collaborating with back-end engineers on integrating back-end logic with mobile applications
- Ability to work on, prioritize and manage multiple assignments and projects
- Anticipate problems and future technical needs and take necessary corrective steps to ensure they are addressed
- Ability to learn and adapt to new technologies quickly
- Ability to collaborate with high-performing, cross-functional team members on site and remotely

TECHNICAL REQUIREMENT

- Have a wide range of mobile development experience and an understanding of mobile software design concepts
- Passionate about programming, and always on the lookout for new technologies
- Android Development: Java, Xml, Eclipse ADT or AndroidStudio IDE, Gradle.
- Strong object-oriented programming and design skills
- 2+ years of hands-on Android experience in a professional environment
- Having published at least one app published in the Play Store would be a great plus
- Comfortable with common demands of Android app development: compatibility libraries, responsive design using fragments, APIs of Google Play Services library like Maps and Analytics, dependency injection libraries like Guice, experience with A/R libraries like Metaio or Wikitude, consume of REST services using Google Client or Apache HttpClient libraries.
- Must have strong problem solving skills: must be creative, analytical, adaptable, logical and thorough and be willing to work in a team environment

PHP DEVELOPER:

JOB DESC:

- Participate in a team-oriented environment to develop complex Web-based applications.
- Maintain existing codebases to include troubleshooting bugs and adding new features.
- Convert data from various formats (Excel, ACCESS etc.) into developed databases.
- Interface with customers directly to: gather requirements, troubleshoot problems, training etc.
- Balance a variety of concurrent projects.

JOB REQUIREMENTS:

- Bachelor's degree (in Computer Science or related field) or equivalent with 3+ years direct hands on experience.
- 3+ years creating complex, data-driven applications for the web using PHP, MySQL, Javascript, CSS, etc.
- 3+ years writing and maintaining SQL in the PostgreSQL or MySQL databases.
- Ability to work independently, take initiative, and contribute to new ideas required in a diverse, fast-paced, deadline-driven team environment.
- Detailed knowledge of web application development and extensive experience using PHP and Javascript as well as relational databases such as PostgreSQL and MySQL.
- Proven hands on experience with JavaScript frameworks such as jQuery and EXT JS
- Proven hands on experience with SECURE CODING techniques
- Experience developing cross-browser frontends using XHTML, CSS, AJAX, JavaScript.
- Organization and analytic skills, with strong problem solving ability.
- Excellent written and verbal communications skills
- Experience with version control systems such as SVN and CVS
- Experience using common business software such as WORD, PowerPoint, Excel and VISIO to visualize, discuss and present ideas to technical and non-technical audiences.
