Project Manager – Code PM

Job Description:

Responsible to ensure the project is delivered as defined in the project plan, within schedule, scope and budget. Develop project plan and manage the team's performance of project tasks. The role includes coordinating effort of the team members and third party contractors. It is also the responsibility of Project Manager to secure acceptance and approval of deliverables from the project sponsor and stakeholders. Project Manager is also responsible for communication including status reporting, risk management, escalation of issues.

Preferred Qualifications:

1. A good technical degree/bachelor degree in computer science or industrial engineering from reputable university.
2. 3 (three) to 5 years hands-on experience in a project management, including all aspects of process development and execution and some exposures in software development.
3. Competent and proficient understanding of Windows platforms.
4. Ability to read communication styles of team members and contractors who come from a broad spectrum of disciplines.
5. Persuasive, encouraging, and motivating.
6. Proficiency in English, both speaking and writing.
7. Proactive and able to work with minimum supervision.
8. Having positive and a can do attitude.
9. High job commitment and willing to learn.
10. Excellent communication (written and verbal) and interpersonal skills.

Programmer/Solution Engineer (Junior and Mid-level Positions) – Code SE

Job Description:

The Solution Engineer/Programmer will be responsible for exceeding technical challenges integrating iSystem Asia solutions into unique customer configurations, as well as being involved in the design, development and/or re-engineering of highly complex application components, integrated software packages, programs and reusable objects residing on multiple platforms. Work directly with customer contacts to troubleshoot, diagnose and resolve technical issues associated with our software. When a solution requires additional expertise, provide customer assistance by escalating and reproducing the problem to internal development sources until a solution is reached.

Preferred Qualifications:

1. S1 degree in Information Technology, Computer Science, Information System, Engineering or related fields.
2. Fresh graduates (Junior Programmer) and/or having 1 to 4 years past experience (Mid-level position) in a technical solution, sales engineering or similar position is a plus.
3. Mastering the programming logic, algorithm and flow.
4. Strong hands on knowledge of programming .Net, SQL Server, C++, PHP & HTML, WordPress (CMS), JavaScript.
5. Proven problem solving skills and the ability to logically troubleshoot issues.
6. Having good presentation skills and the ability to communicate clearly and professionally.
7. Strong follow-through on tasks, requests, and projects.
8. English proficiency, both speaking and writing.
9. Proactive and able to work with minimum supervision.
10. Having positive and a can do attitude.
11. High job commitment and willing to learn.
12. Ability to analyze user requirements, do the documentation and prototyping.
